

**DALLAS COUNTY
COUNTY AUDITOR**

Memorandum

To: Honorable Commissioner Kenneth Mayfield
Road & Bridge District No.4

From: Virginia Porter *Virginia Porter*
Dallas County Auditor

Subject: Road & Bridge District No. 4
Inventory Report

Date: Issued: September 17, 2010
Released: October 7, 2010

On August 17, 2010, our Internal Audit staff performed the annual physical inventory at Road & Bridge District No. 4.

Our specific procedures, findings and recommendations are listed in the attached report. Controls over inventory appears effective, no material findings were noted during annual review. The report is intended for information and the use of management. We believe that enhanced record keeping procedures will allow for more effective operation and control of the inventory.

We appreciate the level of courtesy and cooperation extended during our review.

DALLAS COUNTY, TEXAS – COUNTY AUDITORS OFFICE
ROAD AND BRIDGE DISTRICT #4 INVENTORY REPORT
SEPTEMBER 17, 2010

Scope

A physical inventory of Dallas County Road and Bridge District No. 4's storeroom supplies, fuel and lube, and road materials was performed on August 17, 2010. The purpose of the review was limited to reconciliation of precinct records to physical count and the official general ledger. Other procedures for testing internal control and any findings are reported separately. The District #4 Service Center is located at 4403 West Illinois.

Background

Principal areas of responsibility include maintenance and repair of Dallas County's roads and bridges and those of other municipalities that have maintenance contract with the County. Management consists of one commissioner, two administrative assistants, a road superintendent and an office manager. Currently, District #4 is responsible for 5.413 road miles.

Procedures

Procedures included but were not limited to:

- Generating an annual inventory list and count form
- Reviewing the storekeeper's stock cards, purchases, issues and ending balances for each item
- Physically counting items and recording any discovery items
- Measuring the stockpile of road materials
- Measuring fuel stock by reading meters or using yard stick. Fuel tickets are filled out each time fuel is issued to a vehicle. The stock card is then updated based on the fuel tickets completed.
- Comparing the physical count to the perpetual inventory balance and resolving any discrepancies
- Listing any items issued during the inventory that were not posted to the storekeeper's stock cards.
- Tracing selected purchases to stock cards
- Comparing total amount of inventory purchases per stock cards and the general ledger

Findings

1. The physical inventory count balance of \$78,848.60 was \$340.82 less than the actual perpetual inventory value on the district's stock cards of \$79,189.41.

DALLAS COUNTY, TEXAS – COUNTY AUDITORS OFFICE
ROAD AND BRIDGE DISTRICT #4 INVENTORY REPORT
SEPTEMBER 17, 2010

2. Generally the storekeeper's stock cards were properly maintained with only a few exceptions where the stock card balance was not consistent with the physical quantity on hand. The significant difference greater than \$300 (physical count over(under) stock card) was:
 - Tire – 1400 x 24 (Grader) was over by 1 totaling \$349.79
 - Tire – 1100R-24.5 (radials) was under by 3 totaling \$748.56.
3. Road and Bridge 4 purchased vehicles that included spare tires (6 Tire – 10 x 20) that are not listed on the stock cards.
4. Oracle general ledger inventory account variances are in part due to a system set-up error, which costs material (which includes labor and overhead charges), at a higher billable rate than the inventory rate. As of the date of this report, no effort has been made to resolve the error. Manual adjustments are anticipated each year.

Recommendations

1. Adjustments should be made to the stock card balances based on the physical inventory count of August 17, 2010.
2. The district should continue to perform periodic inventory reviews identifying differences and adjusting stock cards as appropriate.
3. Adjustment should be made to the stock card balance to include items not previously added.
4. Oracle functionality for charging inventory and allocating overhead should be updated for inventory accounts.

Summary

This review is intended to support management of this office in evaluating internal controls over financial issues and inventory. Controls over inventory appear effective; no material findings were noted during annual review. Adherence to and follow through with the recommendations should strengthen internal controls.
