

Trails in Dallas County

This map has been prepared courtesy of **VIRGINIA COOK, REALTORS.**

Studies repeatedly show that hike and bike trails can increase property values, reduce traffic, improve air quality, and attract businesses, visitors and tourists. Because of these important benefits, Dallas County and many of its cities have been actively working to create a comprehensive trail system in the Dallas area. The goal is to have a system that connects work places,

neighborhoods, retail areas and other major destinations, and that enables people to safely walk, run, bike, or skate from one end of the County to the other—a distance of at least thirty miles—without the need of a car. There are currently more than 100 miles of major hard surface trails, and many more miles of trails are presently being designed or built.
